Knowledge of basic and applied physiology, pharmacology, anesthesia, and basic applied anatomy is assumed and should be reviewed in an appropriate text. The Phase I reading list can be used as a guide.

American College of Veterinary Surgeons

Phase II Surgical Competency Examination, February 12–13, 2024

Many journals contain articles pertaining to surgery (both human and veterinary) and should be perused for current literature.

For the 2024 examination, article-based questions will **primarily** come from articles published in the range of August 1, 2018–July 31, 2023 (five years) and August 1, 2020–July 31, 2023 (three years). This date range is based on the publication of content in print rather than online publication date. Questions may also come from older publications considered landmark articles that are significant and essential to the knowledge of the veterinary surgeon.

A partial list of veterinary journals includes:
