

TRANSITION TO INACTIVE PROGRAM STATUS

This form must be completed and filed by the Program Director in advance of the program registration annual renewal application deadline on August 16, 2021.

To be completed by the Program Director:

We have decided to inactivate our training program and will not renew program registration for the July 2022 – June 2023 residency year. We are hereby requesting our current program registration period be extended for one-month, through July 31, 2022, to allow third year (finishing) residents to complete their training as scheduled. The program has experienced no significant changes related to educational events, equipment, facilities, or services and remains in compliance with all ACVS training requirements. We understand that any significant program changes that occur during this final year must still be reported to the Program Compliance Committee and the program may be subject to probation.

We understand that by not submitting a program registration renewal application in August 2021, the program will not be able to begin new residents for the residency year beginning July 1, 2021 nor for the subsequent residency year beginning July 1, 2022.

We understand the program will need to submit a new Application for Residency Training Program Registration in order to reactivate the training program. The earliest opportunity to reapply for registration will in be August 2022 for consideration for the July 2023-June 2024 residency year.

Name of Registered Residency Training Program _____

Type of Residency Large Animal – Equine Emphasis Large Animal–General Small Animal

Program Director _____ Signature _____

Address _____

Phone _____ Email _____
