- Julia Sumner, BVSc, MANZCVS, DACVS

“Dr. Manley was a residency advisor and the driving force behind my MS research at the University of Wisconsin from 1985-1988. Then and ever after, he has been my mental image of an exceptional surgeon; compassionate to patients, technically perfect, collegial to residents and colleagues, and an example of excellence to the profession of veterinary orthopedic surgery.”

– James C. Roush, DVM, DACVS

What being a mentor means to me:

Paul A. Manley, DVM, MSc, DACVS

“I have always felt privileged and challenged to be associated with residents in training. If I were to characterize, in a word, what it means to be honored as a mentor, it would be humbled. I am humbled by the thought that my former residents feel that I made a difference. Thank you to them and to ACVS.”

– Paul A. Manley, DVM, MSc, DACVS
