“Early in his career, Michael Tillson lent perspective to his mentees that a more senior clinician may have long ago forgotten. As much a friend, learning with his mentees, he led by example and with friendship that has stood the test of time. His respectful and dedicated approach to teaching has served him and his many mentees well. Now a seasoned, dedicated Program Director and mentor of mentors, Tillson sets the standard for congenial education with high expectations of those he teaches.”
